EMG/NCV/EP
Model:
EMG 5000Q

Accurate
Reliable
Easy to use

## Model: EMG 5000Q

## **General Information**

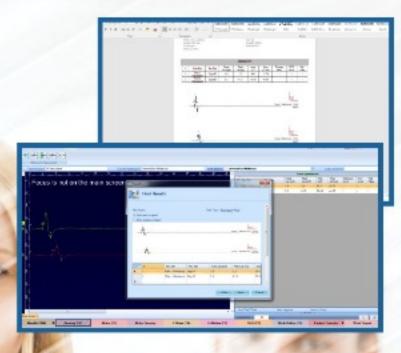

Easy-to-use

Available in 2 or 4 channels Ultra-low-noise State-of-the-art software

Low dependency on body ground positioning Low dependency on earthing quality

## Software Features

- Defining nerves and muscles once and using the defined protocol as routine
- Easily saving and loading patients' data
- Fast report generator in MS Word format
- Powerful signal analyzer
- Online and offline data exporter
- Other applicable functions:
  - Averager
  - Super imposer

## **Technical Specifications**

Power supply: 110/220 V Sampling frequency: 40 kHz

CMRR > 120 dB

Sensitivity: 100 nV - 15 mV Notch frequency: 50/60 Hz

Noise level < 1 µV
